

## **Memeo Backup Professional is a perfect solution for your company when:**

### **You have a small IT department, and don't have time for company-wide desktop support**

Memeo is simple and can be deployed by even novice users in as little as 60 seconds. And once it's set up it automatically backs up files as they are changed or created.

### **You want a solution that integrates with your existing infrastructure.**

Memeo Backup Professional is a desktop application and requires no special hardware. Just download the application and distribute your licenses company-wide in minutes.

### **Some employees need BOTH local backup and online backup**

Memeo offers quick local backup to devices your company already owns such as NAS drives, USB drives, and networks. And online backup for files that need extra protection from fires, earthquakes, or other disasters.

### **Only some of your employees are backing up critical company data**

With Memeo's unique online management console, you can easily view who has installed backup software as well as track what and how much they are backing up.

### **You have all the data security needs of a large enterprise with a much smaller budget**

Memeo Backup Professional is designed for small to medium companies. Not only is it inexpensive, there is no need to buy additional expensive equipment – you can use the storage devices you already own. Memeo backs up encrypted files, as well as allows users to easily encrypt files for added protection.

### **Your IT department is good, but sometimes you need support too**

Priority phone support is provided to you for FREE when you purchase Memeo Backup Professional. (M-F 8:00AM PT to 6:00PM PT)

### **You don't have months or even weeks to deploy a reliable solution**

Using Memeo's online management console, you can distribute licenses across your organization in minutes. Employees can easily deploy this solution in as little as 60 seconds.

### **You need the ability to back up remote employees or offices**

Memeo's management console allows for easy distribution and administration of offsite employees too.

### **You want a backup application that won't slow down employee productivity**

Memeo is meant to work in the background. If you are working, Memeo will back off and wait until your system is idle to backup your important data.

### **You want automatic backup for your employees**

Memeo has scheduling available if you need it, however it is meant to automatically backup files as they are changed or created.

### **Give it a try!**

Find out why more than 16,000 companies already use Memeo Backup to protect their critical company data. Sign up for a Memeo Backup Pro evaluation by visiting: <http://www.memeo.com/business/trials.php>
