

# Memeo® Send

## Overview

Memeo® Send is a service from Memeo, designed from the ground up for secure, assured delivery of files to anyone on the Internet. And it's so simple anyone in the office can use it without special instructions or training.

How many times have you tried to send a large attachment through your email only to find the email never arrived, bounced, or that your email server is out of space? Have you ever struggled with FTP software that was confusing and difficult to use? Are you tired of time-consuming and costly CD and DVD mailings?

Memeo Send is designed to solve these and other issues while providing the same level of peace of mind as physical package delivery services – without the cost, hassle, and delays of burning and sending CDs. Think of Memeo Send as a FedEx® for your digital life.

## Key Features:

### No File Restrictions

There's no size limit – Memeo Send service and desktop software supports any size file that can be saved to your computer. Multiple files or entire folders can be sent using Memeo Send. Plus, Memeo Send supports sending any kind of file – presentations, photos, videos, documents, graphics, CAD files, etc.

### LifeAgent® Technology

Memeo Send utilizes LifeAgent technology to ensure that your package is uploaded and downloaded in a secure, timesaving manner. In the case of a network connection interruption, LifeAgent technology picks up right where you left off. LifeAgent technology also uses an exclusive feature called package streaming, which divides your files into smaller, easily manageable sections so the receiver can begin downloading the package before the sender has your files while the sender is still uploading the files.

### Secure Transport

All files are sent using 256-bit SSL encryption using end-to-end links housed in SAS70 certified datacenters.

### Mac and Windows Support

Cross platform support means graphic artists as well as business professionals can use Memeo Send.

### **Delivery Receipts and Tracking**

As files are downloaded, senders are notified by return receipt email for each recipient. The Memeo Send desktop software and website includes a tracking capabilities where senders can review the status of all deliveries by recipient. This way you'll know when your files were downloaded and by whom.

### **Intuitive User Interface**

Features such as drag & drop allow you to select the files you want to send and simply drop them into the Send box. It's so easy to use that there is no training required.

### **Downloading is Easy**

Files can be downloaded quickly and easily using any popular Web browser, or automatically using our desktop client. Remember, receiving and downloading files is always free.

### **Outlook Plug-in**

The Microsoft Outlook® plug-in allows users to send large files without filling their email quota. This useful tool allows users to send email as usual from Outlook, but then utilizes Memeo Send to send large files.

### **Pay Per Use**

No need to sign up for a monthly subscription. Unlike other online solutions available today, Memeo Send is transaction-based. You are only charged for packages of files you send. There is no charge to recipients who receive your files.

## Requirements / Support:

---

### **Windows**

Windows XP, Vista 32-bit and 64-bit OS. Windows 7 compatible. At least 512 MB RAM and 800 MHz or faster processor recommended. NTFS formatted hard drives required for files over 2 GB.  
Outlook plug-in requires Outlook 2003 or 2007 (Outlook Express not supported).

### **Mac**

Mac OS X 10.5 or newer.

### **General**

25 MB of free disk space for Memeo Send software, plus sufficient disk space to store files sent and received.
